American Cyber Awarded Contract to Support the AMC CIO G-2/6 with IT Governance Services

CLIFTON, VA – American Cyber is proud to announce that it was awarded a Task Order (TO) contract by the Army Materiel Command (AMC) G-2/6 Chief Information Officer (CIO) under the U.S. Army’s Information Technology Enterprise Solutions - 3 Services (ITES-3S) Indefinite Delivery/Indefinite Quantity (IDIQ) contract vehicle. Through this TO award, American Cyber will provide services and support for the Information Technology (IT) Governance Branch. The single award, firm-fixed-price (FFP) contract includes a one-year base period of performance with four additional one-year option periods. Work will be performed primarily in Redstone Arsenal, Alabama.

“We are very excited with this award and to be able to leverage our expertise and services to support the U.S. Army.” Said Laurie Freeman, American Cyber Vice President of Operations. “American Cyber takes pride in our dedication and commitment to optimally serve the U.S. Army, DoD and Federal agency information technology and cyber missions.”

Since 1996, all Federal Agencies and major subordinate organizations have been required by statutory law to account for their investments in IT Hardware, Software, and Services. Through this contract, American Cyber will provide the IT Governance Branch with services to support the plans, coordination, oversight, and reports on the execution of enterprise IT

Governance and the management of IT investments as functional capabilities-based portfolios.

About American Cyber

American Cyber is an award-winning Women-Owned Small Business supporting U.S. Government projects across the globe by identifying, implementing, and integrating leading-edge technology solutions.
