## **American Cyber Wins \$5M Contract for PEO EIS**

**Clifton, VA.** (February 2017) American Cyber scored another win on GSA's Schedule 70 Task Order for Program Support Services. The \$5 million-dollar contract provides support to the Program Executive Office for Enterprise Information Systems' (PEO EIS) Technology Applications Office (TAO).

TAO, as a center of excellence for IT system acquisition, development and integration, is home to an elite government staff supporting tactical and non-tactical IT systems and communications products and services. The team is uniquely task-organized with project management, contracting, finance, security, IT, and logistics cells to provide fast, efficient, secure, and effective acquisition services for other Government organizations.

American Cyber will provide various functional support services to augment TAO's efforts and enable TAO to deliver against urgent customer acquisition requirements.
